

Green Procurement

With Our Business Partners

By setting our own special evaluation criteria in addition to laws, regulations, and customers' requests, Mabuchi confirms that environmentally prohibited substances designated in those standards are not included in the parts and materials we procure for products. To confirm this, we make it a rule that suppliers must submit the following documents certifying that environmentally prohibited substances are not contained in their parts and materials, in addition to an environmental activity survey sheet.

When selecting suppliers, we evaluate each supplier's various environmental conservation activities in addition to the conventional evaluation factors of quality, cost, and delivery.

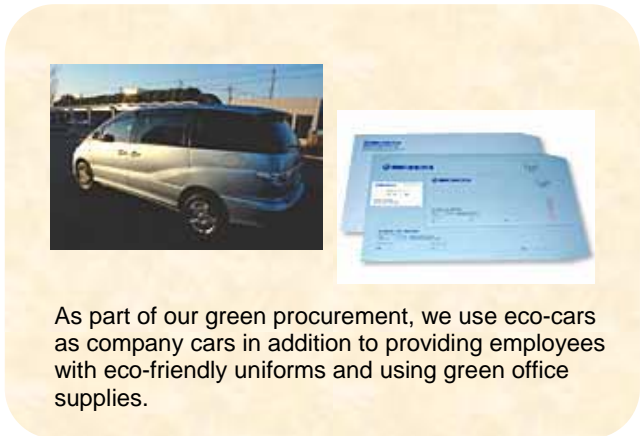

We also promote communication with our suppliers and actively conduct audits on their use and storage of environmental burden causing substances.

Thanks to these activities, we have received no environmental complaints from our customers since the enforcement of the EU's RoHS Directive in fiscal 2006.

We in the Mabuchi Group will continue to promote green procurement so that we can always produce environmentally friendly motors.

Explaining our green procurement system to suppliers (Taiwan Mabuchi)

As part of our green procurement, we use eco-cars as company cars in addition to providing employees with eco-friendly uniforms and using green office supplies.
